PROFILE

Junior full-stack developer with a Software Engineering degree and hands-on experience building real-world web projects. Skilled in C#, Python, JavaScript, and modern web technologies, with foundational knowledge of cloud concepts and exposure to testing workflows and deployment-oriented project setup. Known for learning new tools quickly, solving problems independently, and turning practical requirements into clean, maintainable systems. Now looking to bring strong project work and adaptable technical ability into a full-time IT role.

SKILLS AND TECHNOLOGIES

- Programming: TypeScript/JavaScript, C#
- Cloud & DevOps: GitHub Actions, Docker/Docker Compose, Netlify, Render, Supabase, and foundational Azure/AWS concepts
- Web Development: React, Vite, React Router, Node.js, Express, REST APIs, HTML, CSS
- Databases & ORMs: PostgreSQL, Prisma, SQL Server, Firebase/Firestore, MongoDB
- Testing & Practices: Vitest, Supertest, Git/GitHub, API testing, Agile delivery, requirements analysis, solution design

SELECTED PROJECTS

Personal Budget Tracker - May 2026

- What I built: Built a full-stack personal finance tracker with registration and login, protected dashboard pages, category management, transaction CRUD with filtering, sorting and pagination, fixed income/outgoing tracking, and a deployed frontend/API/database setup.
- Which technologies I used: React, TypeScript, Vite, React Router, Node.js, Express, Prisma, PostgreSQL, Supabase, JWT authentication, bcrypt, Zod, Docker Compose, Vitest, Supertest, GitHub Actions, Netlify, and Render.
- What impact it had: Produced a deployed end-to-end application demonstrating secure user-owned data, relational database modelling, REST API design, CI/testing workflows, environment configuration, and production-style release across separate frontend, API, and database services.

Eclipse Invitational Scoring System - February 2026

- What I built: Built a live gymnastics competition scoring system with secure admin access, score entry and editing, competition management, athlete roster tools, public scoreboard views, stream display modes, and CSV export for meet operations.
- Which technologies I used: HTML, CSS, JavaScript, Firebase Authentication, Cloud Firestore, Firestore security rules, and Firebase Hosting, with GitHub-based deployment workflows.
- What impact it had: Centralised scoring into a single real-time workflow, reducing manual handling during competitions and improving reliability for admins, judges, public scoreboard viewers, and large-screen stream displays.

FundNest (multi-tenant donation platform) - March 2026

- What I built: Built a multi-tenant donation platform with public charity donation pages, tenant admin login and branding controls, platform admin tenant management, Stripe test payments, webhook status updates, and a Docker-based local environment.
- Which technologies I used: Vue 3, Vue Router, Node.js, Express, SQL Server, Stripe Payment Intents, JWT authentication, REST APIs, Docker Compose, and Vitest smoke tests.
- What impact it had: Produced a portfolio-ready end-to-end system that demonstrates tenant isolation, payment processing, and reproducible local setup, while improving reliability through webhook-driven state updates and automated validation.

PROFESSIONAL EXPERIENCE

Clinic Coordinator & Receptionist - Northampton General Hospital | Nov 2023 - Present

- Managed clinic administration and confidential patient records across five hospital departments, adapting quickly to different workflows, teams, and operational processes.
- Used AI-assisted problem-solving to create an Excel appointment and clinic schedule tracker, including VBA automation to improve visibility and day-to-day usage.

- Supported meetings and admin process improvements to streamline workflow, reduce manual handling, suggested changes in workflow to strive to become more paperless and improve schedule tracking.
- Handled high volumes of sensitive patient data in line with NHS and GDPR standards, reinforcing accuracy, discretion, and responsibility in a fast-paced environment.

Eclipse Invitational Scoring Platform - On-site Scoring and Technical Support | 2026

- Provided on-site support during a two-day gymnastics competition, setting up venue screens, audience QR-code access, and the public display workflow.
- Acted as the main score-entry administrator during the event, entering scores, monitoring displays, and supporting competition operations in real time.
- Delivered live debugging, issue resolution, and quick changes on site to keep the scoring website and big-screen output running reliably.

EDUCATION

University of Northampton - BSc (Hons) Games Programming | 2022 - 2024

Coursework focused on computer science fundamentals, practical programming, software architecture, and graphics/game-engine development.

Abbeyfield School Sixth Form - A-Levels (AAA) | 2019 – 2022

A-Level focus included Computer Science, achieving grade A in the subject.

ADDITIONAL INFORMATION

- **Portfolio & GitHub:**
 - GitHub: <https://github.com/rinq123> | Portfolio: <https://rinq123.github.io/WebsitePortfolio/>. Both links contain my project repositories, live demos, and supporting documentation for the work shown in this CV.
- **Technical Interests**
 - Main focus is web development and full-stack development, while continuing to explore cloud services and future plans such as app development and long-form documentary content on AI, network architecture, and related technical systems. Currently completing free online courses for certifications.
- **Tools & Platforms**
 - Git/GitHub, GitHub Actions, Docker Compose, PostgreSQL, Prisma, Supabase, Netlify, Render, Firebase Authentication, Cloud Firestore, Firebase Hosting, SQL Server, Stripe test mode, React, Vue 3, TypeScript, Node.js, Express, and API/testing workflows used across Personal Budget Tracker, Gym-Club-Scoring, FundNest, and WebsitePortfolio.

Languages: English (fluent), Tagalog (fluent)

Interests: the gym, walking, reading manga, and self-directed learning on a wide range of topics
