

Marco Bonifacio

seanmarcobonifacio@gmail.com | 07913558871 | Northampton, UK

A detail-oriented aspiring QA professional with a strong technical foundation in software development, testing, and data accuracy. Experience as a Clinic Coordinator at Northampton General Hospital has developed a disciplined approach to quality, risk management, and process adherence in a regulated environment. Actively transitioning into QA, with hands-on experience in test case design, defect identification, and validation of system behaviour, and a strong interest in improving product quality through structured testing and continuous learning.

TECHNICAL SKILLS

- Languages & Tools: Python, HTML, CSS, JavaScript, SQL, Git/GitHub, Visual Studio Code, Android Studio, Unity/C#, Kotlin, Microsoft Office
- Web & Application Testing Exposure: RESTful APIs, Node.js, Express, MongoDB Atlas, API integration, front-end validation, data handling and validation
- Systems Logic & Testing: Unity, C#, Behaviour Trees, Finite State Machines (FSM), complex system behaviour, decision-logic validation, testing and optimisation
- Agile methodologies, test case design, defect tracking and reporting, GDPR compliance, risk-based problem-solving, stakeholder communication

EDUCATION

University of Northampton – BSc (Hons) Games Programming | 2022 – 2024

- Key Projects: AI Diplomacy Systems for Grand Strategy Games (Dissertation), Social Networking Mobile App, Maze Navigation AI, Park Cleanup (Educational Game)

Abbeyfield School Sixth Form – A-Levels (AAA) | 2019 – 2022

- Demonstrates a strong academic foundation and a proven ability to excel in a challenging curriculum.

PROFESSIONAL EXPERIENCE

Clinic Coordinator & Receptionist – Northampton General Hospital | Nov 2023 – August 2025

- Successfully managed and updated patient records for over 50 patients per shift with consistent accuracy, demonstrating meticulous attention to detail.
- Coordinated complex clinic schedules and workflows, identifying process issues and preventing delays through proactive communication with both patients and staff.
- Managed confidential patient data in strict accordance with GDPR and NHS guidelines, ensuring compliance, accuracy, and audit-readiness of sensitive information.
- Excelled in a high-pressure clinical environment, maintaining accuracy, professionalism, and consistency under time-critical conditions.

SELECTED PROJECTS

Cat Gallery Web App | JavaScript, Node.js, Express, MongoDB Atlas | 2025

- Architected and developed a full-stack, responsive web application with robust user authentication and social features.
- Implemented secure login and session management using bcryptjs and express-session, demonstrating a strong understanding of web security best practices.
- Built a modern frontend with dynamic UI updates, including a dark mode and modal popups, using HTML, CSS, and JavaScript.
- Designed and tested a RESTful API, validating request handling, data integrity, and expected responses across multiple scenarios.

- Managed the development lifecycle using Git/GitHub, including change tracking, validation of updates, and regression awareness

AI Diplomacy Systems for Grand Strategy Games | Unity/C#, Python | 2024

- Designed and developed Rule-Based and FSM AI prototypes for complex in-game decisions, showcasing a deep understanding of AI principles.
- Engineered comprehensive testing frameworks (unit, integration, and scenario tests) and analysed results to validate expected behaviour, identify defects, and assess system risk.

Social Networking Mobile App | Kotlin, SQLite, Android Studio | 2024

- Delivered a complete full-stack Android application with essential social features, including user profiles, posts, and comments.
- Authored and executed 20+ functional and edge-case test cases, identifying defects and validating fixes to ensure a high-quality and reliable user experience.

LANGUAGES

English (fluent), Tagalog (fluent)

INTERESTS

Web development, AI systems, accessibility design, data entry/analysis
