

Marco Bonifacio

seanmarcobonifacio@gmail.com | 07913558871 | Northampton, UK

An aspiring junior developer with a strong foundation in full-stack development, games programming, and AI systems. My experience as a Clinic Coordinator at Northampton General Hospital has honed my ability to manage data with 100% accuracy, work effectively in high-pressure environments, and communicate clearly with a diverse range of people. I'm eager to leverage my technical skills in C#, JavaScript, Python, and Kotlin to solve real-world problems and contribute to a team that values innovation and continuous learning.

TECHNICAL SKILLS

- Languages & Tools: Visual Studio Code, HTML, CSS, JavaScript, Unity/C#, Kotlin, Python, SQL, Git/GitHub, Android Studio, Microsoft Office
- Web Development: Full-stack development, RESTful APIs, Node.js, Express, MongoDB Atlas, API integration, front-end design
- Games & AI: Unity, C#, Behaviour Trees, Finite State Machines (FSM), game mechanics, AI decision-making, testing and optimization
- Other Skills: Agile methodologies, test case design, defect tracking, GDPR compliance, problem-solving, stakeholder communication

EDUCATION

University of Northampton – BSc (Hons) Games Programming | 2022 – 2024

- Key Projects: AI Diplomacy Systems for Grand Strategy Games (Dissertation), Social Networking Mobile App, Maze Navigation AI, Park Cleanup (Educational Game)

Abbeyfield School Sixth Form – A-Levels (AAA) | 2019 – 2022

- Demonstrates a strong academic foundation and a proven ability to excel in a challenging curriculum.

PROFESSIONAL EXPERIENCE

Clinic Coordinator & Receptionist – Northampton General Hospital | Nov 2023 – August 2025

- Successfully managed and updated patient records for over 50 patients per shift with 100% accuracy, demonstrating meticulous attention to detail.
- Coordinated complex clinic schedules and workflows, reducing delays through proactive communication with both patients and staff.
- Managed confidential patient data in strict accordance with GDPR and NHS guidelines, ensuring the integrity and security of sensitive information.
- Excelled in a high-pressure clinical environment, consistently providing empathetic and calm service to patients.

SELECTED PROJECTS

Cat Gallery Web App | JavaScript, Node.js, Express, MongoDB Atlas | 2025

- Architected and developed a full-stack, responsive web application with robust user authentication and social features.
- Implemented secure login and session management using bcryptjs and express-session, demonstrating a strong understanding of web security best practices.
- Built a modern frontend with dynamic UI updates, including a dark mode and modal popups, using HTML, CSS, and JavaScript.
- Designed and tested a RESTful API, ensuring efficient data retrieval and manipulation.

- Managed the entire development lifecycle using Git/GitHub, including version control and collaborative workflows.

AI Diplomacy Systems for Grand Strategy Games | Unity/C#, Python | 2024

- Designed and developed Rule-Based and FSM AI prototypes for complex in-game decisions, showcasing a deep understanding of AI principles.
- Engineered comprehensive testing frameworks (unit, integration, and scenario tests) and analyzed results to validate system performance and propose optimizations.

Social Networking Mobile App | Kotlin, SQLite, Android Studio | 2024

- Delivered a complete full-stack Android application with essential social features, including user profiles, posts, and comments.
- Authored and executed over 20 test cases, successfully identifying and resolving defects to ensure a high-quality user experience.

LANGUAGES

English (fluent), Tagalog (fluent)

INTERESTS

Web development, AI systems, accessibility design, data entry/analysis
